PROFILE

Adewale Adeboye is a certified full-stack developer trained by GoMyCode, with additional certification courses from Udemy and Simpli Learn. I am a solution provider, user-centric and result oriented full stack developer. I bring to the table a rich blend of creativity and good team spirit. With high efficiency in using modern cutting edge technologies to build scalable web applications. I have experience on real-life projects spanning E-commerce and Edtech. I have worked with React, Next.js, Redux, CSS and Tailwind on the front end, Node.js, Express.js and MongoDB on the backend. Including React Native and Flutter for mobile apps. In addition, I continuously invested in my soft skills to enhance collaboration.

PROFESSIONAL EXPERIENCE

Full Stack Web Instructor

One Innovation Hub

02/2024 – present
Remote

- Trained a team of 7 full stack web developers from scratch to entry level.
- In addition, I also designed a Full stack JavaScript training materials for One Innovation Hub. Which was used for the bootcamp training.
- Trained students on the most in-demand front-end development technologies - HTML, CSS, JavaScript and React.js. Which enables them to translate figma designs to beautiful user interfaces and responsive web designs for optimal viewing on a variety of devices, with high functionalities.
- Furthermore, I also provided guidance on how to build the server side of an application using cutting edge modern technologies like Node.js, Express.js and MongoDB to store data.
- Trained students on how to use git and GitHub to collaborate. Students used this knowledge to collaborate and build a Website for One Innovation Hub.
- I Oversaw students projects including building of One Innovation Hub website, students personal portfolio, personal resuming using code and other pets projects.
- In addition, the students also learnt how to debug and read error on thier development environment, including how to use other developer tools.
- I also provided guidance to the students on the best coding practice to ensure code quality.

- I also coached students on soft skills required to excel in tech, how to market themselves including, Resume and LinkedIn optimization.

Front-End Developer Intern

Varen technologies

09/2023 – 11/2024

Remote

- Worked on the client side on Dalatek application.
- Worked on the front-end functionality using Refine and Next.js
- Translated Dalatek Figma designs to code using CSS and Chakra UI.
- Collaborated closely with other development team members using Git and Github to update and maintain the code.
- Ensured the seamless integration of front-end components with back-end services.
- Optimized web pages for performance, scalability, and cross-browser compatibility
